

The **Toronto Climate Campaign** is a coalition of representatives from unions, environmental and social justice organizations, students, and citizens whose key initiative is to educate, motivate and mobilize a collective mass-movement to demand equitable and just solutions to global warming. Our goal is to effect an urgent shift by governments, businesses and institutions toward policies that aggressively promote sustainable living for all peoples and all species. Our immediate demand is Kyoto Now!

**12 pm  
Rally at Yonge-Dundas Square to  
Reclaim Earth Day**

On April 22, 1970, the environmental movement burst onto the political stage with one of the largest grassroots demonstrations ever seen. Let's put the activism back into Earth Day with a rally to call on the Harper government to implement Kyoto, introduce mandatory emission reductions and support green energy.

**1 pm  
U-Turn Parade**

The parade route goes from Yonge-Dundas Square to Queen and Spadina where we will do a U-turn back to Queen and John Street. Bring your banners, placards, and noisemakers to show the Harper government that we want an about-face on climate change policy.

**2-4 pm  
Street Festival (Queen and John Street)**

Join Streets are for People for a festive, interactive, all-ages celebration of Earth Day!
